IDENTIFIERS	*Arkansas

ABSTRACT

Fall 1983 on-campus enrollment data in Arkansas colleges and universities are presented, along with a narrative description of trends. Statistical tables cover the following areas: fall on-campus headcount by student level and type of institutions, 1974-1983; number and distribution of fall full- and part-time on-campus headcount students, 1980-1983; fall on-campus headcount of first-time enrollees; legal residence of students at state-supported and private institutions, and sex and median age of students. Enrollment at state two-year institutions increased to 12,767, or 17.39% of the total enrollment. State four-year enrollment was up in all but two institutions. The college-going rate increased during 1983, although the number of first-time entering students decreased because of declines in high school graduates. Full-time enrollment declined by 409 students, while part-time enrollment increased by 1,114. Twenty-three of the 32 institutions increased in part-time enrollment. The average load per student remained stable at 15 hours for full-time undergraduates and 5 hours for part-timers; and 11 and 4 hours for full-time and part-time graduate students, respectively. Over 90% of students in Arkansas state-supported institutions list Arkansas as their legal residence. (SW)

FOREWORD

This is the fourth in a series of annual reports on fall on-campus enrollment in the state of Arkansas. The information in this report is based upon data collected by the Arkansas Department of Higher Education (ADHE) through the Arkansas Higher Education Information System (AHEIS), a network of public and private colleges and universities that share data in order to improve both undergraduate and graduate education.

Through the diligence of the member institutions who regularly and promptly provide this data, ADHE can offer them analyses and comparisons of higher education information for use in their own planning and evaluation. These reports, too, often provide a means of communicating important new or continuing trends that affect many aspects of Arkansas college and university operations. This report, for instance, reveals the impact of increased part-time enrollment, particularly at the public two-year institutions.

Without the unfailing support of the institutional personnel and administration, ADHE would find it impossible to provide these reports. The high degree of integrity and dedication to accuracy of those who collect the data and prepare the AHEIS forms is primary to the success of the information system.

The primary author of this report was Joanne Branscum. ADHE Deputy Director Tom Spencer and Research Analyst Donna Davoren provided assistance in the preparation of tables and graphs and in editing. Mary Griebel and the ADHE production staff provided the technical expertise for final publication.

EXECUTIVE SUMMARY

A record 73,905 students enrolled in Arkansas state and independent institutions during Fall 1983 (Tables 1 and 2). Most of the increase was due to significant gains in part-time enrollment at state two-year colleges.

Consistent with a national trend, enrollment at state two-year institutions increased to 12,767, or 17.39% of the total enrollment. North Arkansas Community College (NACC) experienced the largest one-year part-time increase, up 263%. State four-year enrollment was up in all but two institutions: the University of Arkansas at Fayetteville (UAF), down 602 students, and the University of Arkansas at Pine Bluff (UAPB), down 166 students. Both two-year and four-year independent institutions decreased slightly, having varied from year to year by only a few percent.

The college going rate increased during 1983 although the number of first-time-entering students decreased because of declines in high school graduates. First-time-entering students declined by 1.4%, with only the state two-year institutions experiencing a gain in this category, up by 57 students. Other lower division enrollees remained relatively stable, with the largest increase in part-time students, up 20% (Tables 4 and 5).

Upper division enrollment showed an overall increase, most of which was due to a 5.5% increase at state four-year institutions. Unclassified pre-baccalaureate enrollment, up by over 80% since 1980, consisted of over 90% part-time students. Graduate enrollment had a one-year decline of 1.8% (-86) at the state level and a 9.3% (+10) increase at independent institutions. First professional enrollment, because of limited admissions, remained stable at 752 enrollees in the two law programs and 540 enrollees in the General Medicine and Pharmacy programs.

A record number of part-time students averted the overall decline in enrollment in 1983 (Tables 6 and 7). Full-time enrollment declined by 409 students while

part-time enrollment increased by 1,114, a net gain of 705. Twenty-three of the thirty-two institutions, encompassing all four categories of colleges, experienced increases in part-time enrollment (Tables 6 and 7).

The average load per student remained stable at 15 and 5 hours for full-time and part-time undergraduate students, respectively; and 11 and 4 hours for full-time and part-time graduate students, respectively (Table 8).

In 1983, 53% of all students in Arkansas colleges and universities were female. The number of females in college increased until 1980 and since then has remained in the 50% range. Two-year state and independent colleges had the highest percentage of female students (60%) while the four-year institutions enrolled about 51% females (Table 9). The median age for full-time first-time entering students was 19; other undergraduates' median age was 21. The first-time graduate category's median age was 26, and part-time graduate's median age was 31. Overall, the median age of Arkansas college students was 21 in 1983 (Table 10).

Over 90% of students in Arkansas state-supported institutions list Arkansas as their legal residence. This number has varied little over the past few years.

ON-CAMPUS ENROLLMENT IN ARKANSAS HIGHER EDUCATION INSTITUTIONS, FALL 1983

The fall 1983 enrollment report discusses on-campus headcount enrollment as of the eleventh class day at Arkansas' 32 state and independent colleges and universities. This report includes discussions concerning trends by type of institution, student level, attendance, age, sex, and current legal residence.

In addition to the tables presented in the narrative, data regarding individual institution headcount, average load, current legal residence, and age are provided as Appendix A, a Glossary is provided as Appendix B, and institutions' names and abbreviations are provided as Appendix C.

ENROLLMENT TRENDS BY TYPE OF INSTITUTION

A record 73,905 students were enrolled in Arkansas' colleges and universities this past fall, up 1.0% from fall 1982. (See Table 1.) The fall 1983 increase was primarily in part-time enrollment in all categories of institutions, with the greatest increase in part-time students occurring at the state two-year institutions.

State Two-Year

According to the American Council on Education (ACE), college and university enrollment was up nationally 1.1%. ACE attributes the national increase to "an increase in part-time enrollment in community, technical and junior colleges."

Consistent with this statement, the most significant percentage gain in Arkansas college enrollment during the past ten years occurred at the state-supported two-year institutions. Enrollment at these schools increased from 5,891 in 1974 to 12,767 in 1983, up 116% (see Table 2). A portion of the enrollment increase can be attributed to the establishment of four state-

supported two-year colleges during the past ten years. Two institutions, Mississippi County Community college (MCCC) and Southern Arkansas University - El Dorado Branch (SAUE), began operation in 1975, and a third, Southern Arkansas University - Technical Branch (SAUT), became part of the state higher education system in 1975. The fourth institution, Rich Mountain Community College (RMCC), began operation July 1, 1983. The combined fall 1984 enrollment for those four institutions was 2,901, or 23% of the total state two-year enrollment.

An additional portion of the large increase may be attributed to the rapid growth in enrollment common to the other new community colleges established in 1973 and 1974: Garland County Community College (GCCC), East Arkansas Community College (EACC), and North Arkansas Community College (NACC). The 1974 to 1983 headcount enrollments for state two-year institutions are shown in Table A-1 in the appendix.

Each of the state two-year institutions experienced a dramatic increase in enrollment from fall 1974 to fall 1983. The smallest percentage increase occurred at Westark Community College (WCC), up 38%, while North Arkansas

TABLE 1. FALL ON-CAMPUS HEADCOUNT BY TYPE OF INSTITUTION, 1974 - 1983

***Rich Mountain Vocational-Technical School became Rich Mountain Community College July 1, 1983

Community College (NACC) experienced the largest percentage increase, up 263%. Driven primarily by their increases in numbers of part-time students, the proportion of Arkansas college students attending state two-year institutions has increased during the past three years, from 15.49% in fall 1981 to 17.39% in fall 1983. The proportions of fall headcount enrollment contributed by each type of institution are shown in Figure 1.

In 1983 state two-year enrollment increased by 4.8% (+581) over 1982. Over half of the increase (299) resulted from the establishment of RMCC. The increase in part-time enrollment at the state two-year institutions was also a significant factor in the enrollment increase. While seven of the ten state two-year institutions had enrollment increases, three had increases exceeding 10%. The increase at each of these three institutions resulted from a significant increase in part-time students.

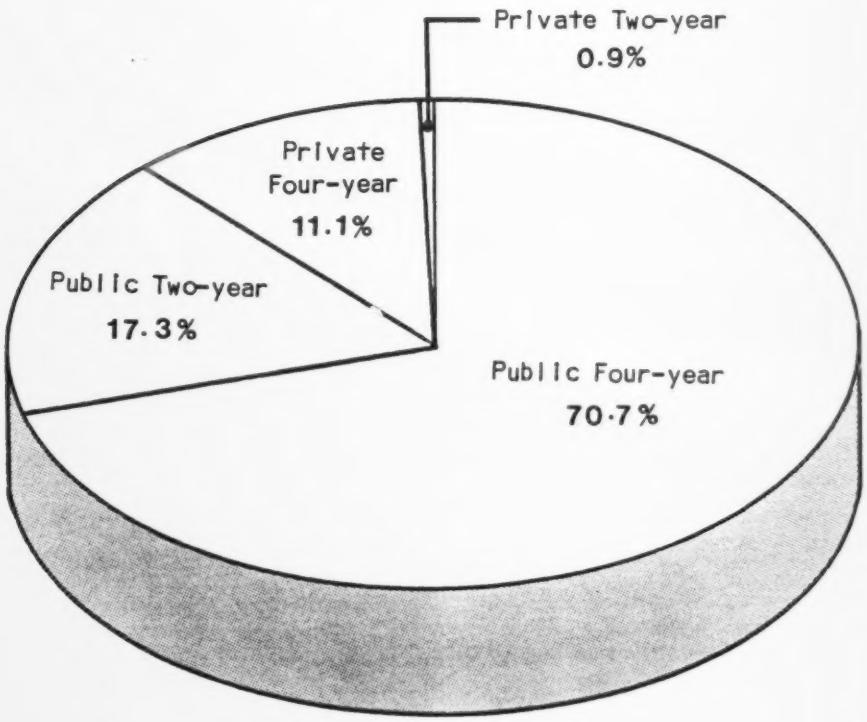
State Four-Year

State four-year college enrollment climbed from 39,599 during the fall of 1974 to 52,270 in the fall of 1983, up 32% (see Table 1). This represented the largest numerical increase of any type of institution during this period. Only one institution, Henderson State University (HSU), had fewer students in fall 1983 than in fall 1974. The smallest gain in enrollment occurred at the University of Arkansas at Pine Bluff (UAPB), up 22%, while the largest gain occurred at the University of Arkansas at Little Rock (UALR), up 62%. The 1974 to 1983 fall headcount enrollments for state four-year institutions appear in Table A-2 in the appendix.

Although students attended state four-year institutions in record numbers this past fall, state four-year enrollment as a proportion of total enrollment declined slightly. In 1983, 70.7% of all Arkansas college students attended state four-year institutions as compared to 71.1% in 1982 and 71.9% in 1981.

From fall 1982 to fall 1983, only two state four-year institutions experienced declines in headcount enrollment -- the University of Arkansas at Fayetteville (UAF) and UAPB. Enrollment at UAF declined by 602, and enrollment at UAPB declined by 166. The decline at UAPB resulted from declines in both in- and

FIGURE 1. FALL ENROLLMENT BY TYPE OF INSTITUTION AS A PROPORTION OF TOTAL FALL ENROLLMENT IN ARKANSAS COLLEGES AND UNIVERSITIES, 1983



out-of-state students. The number of Arkansas residents attending UAPB declined by 73 while out-of-state students declined by 93. The largest gains in headcount enrollment occurred at Arkansas State University-Jonesboro (ASUJ), up 7.4% (+577), and the University of Arkansas at Monticello (UAM), up 4.8% (+87).

More and more students attending college this past fall chose to attend a regional institution. This is true for all the state institutions except UAF, whose drawing area covers counties in all regions of the state. The Geographic and Institutional Origin of Arkansas College Students, Fall 1983 report graphically displays the geographic origin of full-time first-time-entering students. Tables displaying the county and state of origin of all undergraduate students are also presented in that report. While most of the state four-year institutions did not draw from a significantly larger portion of the state, this year several schools did tend to attract more students from their immediate area. The decline in enrollment at UAF can be traced to the increased number of Arkansas residents attending regional institutions.

Independent Two-Year

Enrollment at the independent two-year institutions has varied only slightly during the past ten years. In 1974, 601 students attended independent two-year institutions as compared to 657 students in fall 1983. There are currently three independent two-year institutions in Arkansas: Crowley's Ridge College, (CRC), Shorter College, (SC), and Southern Baptist College (SBC). About 1% of Arkansas' fall 1983 college students attended independent two-year institutions. The 1974 to 1983 fall headcount enrollments for independent two-year institutions appear in Table A-3 in the appendix.

Twenty-three fewer students attended Arkansas' three independent two-year institutions this year than last. Enrollment at CRC declined by six students while enrollment at SC declined by 65. SBC's enrollment increase, up 48, resulted primarily from an increase in part-time students. The decline at CRC resulted from a decline in part-time students, while SC's decline occurred in full-time students.

Independent Four-Year

In the fall of 1983, 8,211 students attended independent four-year institutions as compared to 7,862 in the fall of 1974. Independent four-year college enrollment has varied less than 5% from year to year since 1974. While total enrollment at the four-year independent institutions has varied only slightly, several institutions have experienced significant changes in enrollment. The 1974 to 1983 fall headcount enrollment for independent four-year institutions appear in Table A-4 in the appendix.

The largest ten-year decrease in enrollment at an independent four-year institution occurred at Arkansas Baptist College (ABC), down 68% (-368). The largest increase in enrollment occurred at Harding University (HU), up 16% (+406). (The enrollment for Central Baptist College (CBC), which was a two-year institution in 1974, is reported with the four-year independent institutions, since that is its current category.)

While part-time enrollment at the state's nine four-year independent institutions was at a record high, full-time enrollment was continuing its steady decline. In the fall of 1983, 7,399 full-time students attended independent four-year institutions as compared to 7,605 in 1982. The decline in full-time students (-206) was only partially offset by the increase in part-time students (+136).

HEADCOUNT BY STUDENT LEVEL

First-Time Enrollment

For the first time since fall 1980, the Arkansas college going rate increased. The fall 1983 college going rate of 39.3% reversed a three year decline. The definition of "college going rate" is fall full-time first-time entering college freshmen whose residence is Arkansas divided by previous spring Arkansas high school graduates. For example, in fall 1983, 11,169 Arkansas residents enrolled for the first time as full-time students at Arkansas colleges. Spring 1983 Arkansas high school graduates equaled 28,410 (11,179/28,410 = 39.3%). Although "full-time first-time-entering" cannot be

precisely defined as previous spring high school graduates, this is considered to be a close approximation since over 85% of these students were nineteen years of age or under. This increase can be attributed to a significant effort by college administrators across Arkansas to increase the percentage of Arkansas high school graduates attending college.

Even though the college going rate increased this year, the number of first-time-entering students decreased due to a decline in the number of students graduating from high school. Projections through 1998-99 indicate an expected decline in high school graduates ten of the next sixteen years. Table 3 displays Arkansas high school graduate projections through 1998-99. (See Arkansas Public High School Graduates, Projections to 1998-99 for further information.)

TABLE 3. ARKANSAS HIGH SCHOOL GRADUATES, ACTUAL 1974-75 THROUGH 1982-83, PROJECTED 1983-84 THROUGH 1998-99

Year	Actual Number of High School Graduates	Year	Projected Number of High School Graduates
1974-75	26,836	1983-84	26,486
1975-76	27,029	1984-85	25,713
1976-77	27,719	1985-86	25,090
1977-78	28,087	1986-87	25,360
1978-79	28,302	1987-88	25,882
1979-80	29,052	1988-89	26,565
1980-81	29,414	1989-90	25,330
1981-82	29,710	1990-91	24,487
1982-83	28,410	1991-92	24,425
		1992-93	23,918
		1993-94	23,669
		1994-95	25,943
		1995-96	24,938
		1996-97	25,896
		1997-98	26,510
		1998-99	25,815

Table 4 displays the number of full-time first-time-entering college students by institution for 1980 through 1983. Only state two-year institutions had a net gain in full-time first-time enrollees between 1982 and 1983, up 57 students. A total of 2,405 full-time first-time enrollees entered state two-

year institutions during the fall of 1983 as compared to 2,348 during the fall of 1982. The net gain in first-tinme enrollees resulted from the establishment of a new state two-year institution, RMCC. Eighty-five full-time first-time entering students enrolled at RMCC during this past fall. Appendix table A-5 displays total part- and full-time first-time enrollees by institution for fall 1977 through fall 1983.

Of the state and independent two- and four-year institutions, only state two-year institutions experienced gains in full-time first-time enrollees. At the same time, as seen in Tables 4 and 5, only state two-year institutions experienced losses in part-time first-time enrollees. Part-time first-time enrollees were up 18% at the state four-year institutions, up 23% at the independent two-year institutions, and up 79% at the independent four-year institutions. While full-time first-time enrollees in Arkansas' colleges declined, part-time first-time enrollees increased slightly. However, the gain in part-time first-time enrollees was not large enough to offset the loss in full-time first-time students. Consequently, first-time enrollees declined by 1.4% (-245). Table 4 also displays on-campus headcount by other student levels by type of institution, for fall 1980 through fall 1983.

Other Lower Division Enrollment

The state two-year institutions had the largest amount of overall and three-year (since 1980) increases in other lower division enrollees, up 7.6% since 1982 and more than 23% since 1980. The largest part of the increase was due to a 38.3% increase in part-time lower division students. Full-time lower division remained about the same from 1982 to 1983, having decreased by 9.1% since 1980.

At the four-year institutions, growth in other lower division students has been modest over the three years and from 1982 to 1983 decreased by 3.0%. Part-time enrollment of other lower division students has remained stable at about 3,100 since 1980; full-time enrollment increased modestly until 1983, when it dipped by 3.4%.

Other lower division enrollment has fluctuated year-to-year by as much as

* Rich Mountain Vocational-Technical School became Rich Mountain Community College July 1, 1983.

+/-10% at the two-year independent institutions. Part-time enrollment rose over 150% in three years but still remained small (77 students in 1983).

Independent four-year colleges have enrolled about 2,500 students each year in the other lower division category, except for one large increase in 1981. This was true of both part- and full-time enrollment.

Overall, full-time enrollment of other lower division students has remained stable, while a large increase has been seen in part-time students, almost 20%.

Upper Division Enrollment

Upper division enrollment at the four-year institutions increased 5.5% since 1980. Most of the increase occurred because of a gain in full-time upper division enrollment. Part-time upper division enrollment decreased for two years after 1980 but increased again during 1983.

Four-year independent institutions' full-time upper division enrollment remained stable at about 3,100. Part-time enrollment in this category has increased 18.5% since 1980 but was still small in 1983.

Unclassified Pre-baccalaureate Enrollment

At the state institutions, unclassified pre-baccalaureate students are over 90% part-time. This classification had decreased since 1980 and in 1983 rose again, but not to the 1980 level. Unclassified pre-baccalaureate part-time enrollees at the state four-year institutions comprised about one-third of all unclassified pre-baccalaureate enrollees. The part-time enrollees have risen by about 80% since 1980. Full-time pre-baccalaureate enrollees had remained at about 1,700 until 1983, when this category rose to 1,909 (a 13.0% increase in one year).

The two-year independent institutions had few unclassified pre-baccalaureate; in 1983, only 56 were registered, and all were part-time.

Full-time unclassified pre-baccalaureate students remained stable at the four-year independent institutions. These colleges have reported about 200 each year for the last three years.

Graduate and First-Professional Enrollment

Eleven of Arkansas' thirty-two colleges and universities offer advanced degrees: eight state-supported and three independent institutions. In the fall of 1983, a total of 6,199 students enrolled in either graduate or first-professional programs at these institutions. Of that number, 98% were enrolled in one of the state-supported institutions.

Graduate enrollment at the state level declined by 1.8% (-86). Independent graduate enrollment increased by 9.3% (+10). Although the decline in graduate enrollment at the state institutions during the past four years has been slight, it has been steady. Two institutions experienced significant changes in graduate enrollment: ASUJ experienced significant growth, up 13% (+92 students), while UALR experienced a significant decline, down 15% (-138 students).

A total of 118 graduate students enrolled at independent institutions during the fall of 1983. Of that number, 9 attended CBC, 90 attended HU, and 19 attended Ouachita Baptist University (OBU). These three institutions offered a total of 15 graduate degrees. Of those 15 degrees, 83% were in the field of education.

Four first-professional degrees are currently offered in the state of Arkansas: Law at UAF and UALR and Pharmacy and Medicine at the University of Arkansas for Medical Sciences (UAMS). Fall 1983 law school enrollment was 391 at UAF and 361 at UALR. Law school admissions were purposely limited during fall 1983. Future plans call for admitting only 350 to 400 students into the law program each year. As has always been the policy at UAMS, only a limited number of medical student slots were available. All of the 540 first-professional students at UAMS this past fall were enrolled in the medical program.

Part-Time Enrollment

Record numbers of part-time students attended college this past fall. In fact, a decline in Arkansas college enrollment was averted by the increase in part-time students. Part-time enrollment increased by 1,114 students while full-time enrollment declined by 409 for a net enrollment increase of 705 students. All four types of institutions experienced gains in part-time enrollment. On an institution-by-institution basis, 23 of the 32 colleges and universities in Arkansas had an increase in part-time enrollment. Table 6 displays fall full- and part-time on-campus headcount by institution from 1979 through 1983. Table 7 shows this same data on a percentage basis.

AVERAGE LOAD

Average load is calculated by dividing the number of student semester credit hours taken by the number of students. Table 8 displays average load data by student level by type of institution for 1980 through 1983. Average loads have varied little during the past four years. The average load for a full-time undergraduate student was 15 hours and, for a part-time undergraduate student, the average load was 5 hours. The average load for full- and part-time graduate students was 11 and 4 hours respectively.

The average load for full-time first-professional students was 16 hours. The average load for law students at UAF was 14 hours, while the average load at UALR was 13 hours. The average load for medical students at UAMS was 19 hours. Appendix tables A-6 through A-9 display headcount and average load by student level by institution for fall 1983.

ENROLLMENT BY SEX

In the fall of 1983, 53% of all Arkansas college students were female. During the last decade, the number of female college students has increased significantly. Since 1980, however, female students as a proportion of total students has been relatively stable. Current enrollment of male and female students

SOURCES: ADHE 02-1, 02-2

resembles current Arkansas population. Of Arkansas' 1980 residents between the ages 19 and 65, 52% were female. Table 9 displays males and females as a percentage of fall headcount enrollment by institution for fall 1979 through fall 1983. In all types of institutions, over 50% of the students enrolled in the fall of 1983 were female. The two-year institutions, both state and independent, had the highest percentage enrollments that were female: 60%. The state and independent four-year institutions were 51% female.

ENROLLMENT BY AGE

Table 10 displays median age of students by student level by type of institution for fall 1980 through fall 1983. The median age of students in each category has varied little during the past four years. The median age of all full-time first-time entering Arkansas college students was 19. The median age of other undergraduates was 21. Full-time graduate students' median age was 26, while the median age of part-time graduate students was 31. The median age of all Arkansas college students was 21. Of the fall 1983 Arkansas college students, 41%, or 30,119, were freshmen. Generally, freshmen represent around 40% of all college students. Consequently, the median age of all college students remains about 21 years.

Appendix tables A-10 through A-21 display median age by institution by student level.

ENROLLMENT BY CURRENT LEGAL RESIDENCE

A student's current legal residence is his present legal residence for the period being reported. Current legal residence differs from geographic origin in that current legal residence may change from semester to semester while geographic origin is the origin of the student at the time of original admission to the institution. As long as the student is enrolled at the institution, geographic origin remains the same.

Table 11 displays on-campus headcount by student level and current legal resi-

dence by type of institution for fall 1980 through fall 1983. Current legal residence information is collected only from the 20 state-supported Arkansas colleges and universities. Table 12 displays average load by student level and current legal residence. The trend most evident from viewing the data is the increase in part-time enrollment.

Of the 65,037 students attending state-supported institutions in the fall of 1983, 91% listed in-state current legal residences, and 9% listed out-of-state current legal residences. Figure 2 displays state two-year and four-year enrollment by current legal residence. During the past four years, the proportion of out-of-state students attending an Arkansas colleges has varied little. Tables A-22 through A-25 show detailed information on current legal residence.
